SCRUM MEETING #7
04/25/2022
1:32 P.M. - 1:54 P.M.
Team Members:
Josh Yang
Jadepan Thedthong
Trevor Sweeney

Round-Robin/Minutes

Jadepan:

What did you do after the last SCRUM meeting?
- *Now be able to get Fuel Price with a new API as the old one is very limited in the number of requests.*

What will you do today?
- *Fixing where the calculation is incorrect due to an API request taking too long.*

Is there anything that you're stuck on?
- *Struggling with how to do async and await functions in JS.*

Comfort Level - How comfortable are you with the current pace that we are working on?
- *I want to work more and speed up the project*

Trevor:

What did you do after the last SCRUM meeting?
- *Created test HTML for UI design.*
- *Improved UI design*

What will you do today?
- Assign tasks to members.
- Continue to work on UI

Is there anything that you're stuck on?
- Nothing

Comfort Level - How comfortable are you with the current pace that we are working on?
- Has to put more effort into the project in order to finish the backlog tasks.

Josh:

What did you do after the last SCRUM meeting?
- Add start and finish location, Google Maps API.
  - Add format direction on the top

What will you do today?
- Finish on map direction
- Look into place recommendations.
- Work on the online sketch.

Is there anything that you're stuck on?
- nothing

Comfort Level - How comfortable are you with the current pace that we are working on?
- Need to speed up the process.

SCRUM MEETING #8

04/27/2022

7:04 P.M. - 7:14 P.M.

Team Members:

Josh Yang

Jadepan Thedthong

Trevor Sweeney

Round-Robin/Minutes

Trevor

What did you do after the last SCRUM meeting?
- · Customized panels
- · Implement auto-scroll feature

What will you do today?
- · Continue to work on auto-scroll issues

Is there anything that you're stuck on?
- · Learning JS for auto-scroll

Comfort Level - How comfortable are you with the current pace that we are working on?

- · Comfortable, making progress currently

Jadepan:

What did you do after the last SCRUM meeting?
- · Added features to HTML
- · Added toggle buttons for fuel price inputs, so the users can input customed data.
- · Fixed/Found a workaround for the miscalculation problem.

What will you do today?
- · Finish hotel recommendations.
- · Adding different types of fuel

Is there anything that you're stuck on?
- · Need to learn to append elements from JS

Comfort Level - How comfortable are you with the current pace that we are working on?
- · Feel comfortable with the current pace.

Josh:

What did you do after the last SCRUM meeting?
- · Worked on the map testing. Can add starting point and ending point. Shows route.

What will you do today?
- · Fix query for user location for starting location point.
- · Restaurant API.

Is there anything that you're stuck on?
- · Stuck on user coordinates and setting as a starting point.

Comfort Level - How comfortable are you with the current pace that we are working on?
- · If I keep the pace, then I am comfortable.

SCRUM MEETING #9

04/30/2022

Team Members:

Josh Yang

Jadepan Thedthong

Trevor Sweeney

Round-Robin/Minutes

Jadepan:

What did you do after the last SCRUM meeting?
Can now choose the two: diesel and gasoline.
- *Now can get hotel lists with pricing (not be able to display them on HTML yet.)*

What will you do today?
- *Hotel List, hopefully, finished by Monday.*

Is there anything that you're stuck on?
- *The API for the hotel list doesn't include hotels detail like pricing.*

Comfort Level - How comfortable are you with the current pace that we are working on?
- *Want everything to be done by Wednesday.*

Trevor:

What did you do after the last SCRUM meeting?
- *Put josh's map in the panel.*

What will you do today?
- *Fixed element to push the price, permanently on the screen.*
- *Move panels around*

Is there anything that you're stuck on?
- Not really.

Comfort Level. How comfortable are you with the current pace that we are working on?

- *I want to be finished by Wednesday.*

Josh:

What did you do after the last SCRUM meeting?

- Finished Map displaying on a new UI design
- Added multiple transportation types
- Auto-complete for the user's destination and starting input.

What will you do today?

- Fixing Map does not refresh when a new destination is added but will refresh when a new mode is selected.

Is there anything that you're stuck on?

- Not really.

Comfort Level - How comfortable are you with the current pace that we are working on?

- Everything has to be done by Wednesday.
